

MediGuide - User Stories

1. Prescription Registration As a patient, I should be able to have my doctor's prescription recorded via text or audio on my phone, so as to ensure all my medications, times, and conditions are accurately stored in the app.
2. Medication Reminders As a patient, I should be able to receive notifications before and at the scheduled medication time, so as to never miss a dose.
3. Condition and Consumption Validation As a patient, I should be able to mark whether the condition for taking the medication is met and confirm consumption, so as to keep an accurate record of my medication adherence.
4. Automatic Recording of Missed Doses As a patient, I should be able to have the app automatically record missed doses if I don't confirm intake, so as to maintain a reliable consumption history.
5. View Consumption History As a patient, I should be able to view my medication consumption history, so as to monitor my adherence over time and share it with my doctor if needed.
6. Account Management As a patient, I should be able to create and log in to my personal account, so as to securely store my prescriptions and medication history.
